### 2G SHUFFLE ACCENTS

» \$9.95

Rhino Skin recently released brightly colored aluminum covers for the 2G Shuffle. Neoprene-lined so they won't scratch your player when you slide them on, they give your teeny iPod a bit of a custom kick. Available online at [saunders-usa.com](http://saunders-usa.com).

# Cool iPod stuff

### OTTERBOX FOR IPOD NANO 2G

» \$39.95

Waterproof, crushproof and dust-proof, OtterBox protects your device whenever you take it to the beach, get caught in a desert storm or accidentally drop it in the path of an oncoming bus. Available online at [otterbox.com](http://otterbox.com).

### SOLAR IPOD CHARGER

» \$99

Small and lightweight, Better Energy Systems' Solio catches sunlight and converts it to solar power. A red LED indicates the level of charge; the solar battery efficiently recharges iPods and cell phones. Available online at [redenvelope.com](http://redenvelope.com).

### TANGLETRONICS DNA SPEAKERS

» \$63

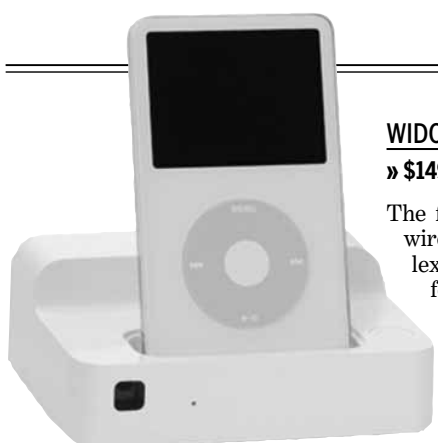

Play that funky music through speakers equally funky. TangleTronics' new iPod speakers sit atop stalks that can be twisted and turned in any direction. Available online at [tangletoys.com](http://tangletoys.com).

### G-TECH MESSENGER BAG

» \$129

G-Tech's iPod-enabled messenger bag has a built-in speaker and a smart strap that lets you control your player even while it's stashed inside. An extension jack works with pretty much any device, including your laptop, so you can route audio from other electronics through the speaker. Available at [CompUSA](http://CompUSA) and online at [g-techworld.com](http://g-techworld.com).

### WIDOCK

» \$149.99

The first iPod dock that provides wireless syncing with iTunes, Silex's wiDock allows you to transfer new songs or videos to your iPod without connecting your player to your computer. It also outputs to stereo and television and charges your iPod's battery. Available online at [jr.com](http://jr.com).

### TUNEVIEW IPOD REMOTE

» \$179.99

Share your music over your home stereo or pictures and video on your TV without ever touching your AV gear. How? TuneView lets you display and control your iPod from up to 150 feet away as if it were in your hand. It's got two-way RF connectivity and a color LCD screen. Available online at [keyspan.com](http://keyspan.com).
